

LEARN ESPERANTO

Esperanto is a constructed auxiliary language. Its creator was L. L. Zamenhof, a Polish eye doctor. He created the language to make international communication easier. His goal was to design Esperanto in such a way that people can learn it much more easily than any other national language.

“I think you should learn Esperanto because it's a fun and simple constructed language that has millions of speakers worldwide and easy to learn. Learning it will also give you more confidence if you decide to learn other languages.”
